About GM Vertex Club

GM Vertex Club is a premier technology and innovation community at Gomendra Multiple Campus (GMC), Birtamode, Nepal. Founded with the vision of empowering students through technology, the club serves as a hub for learning, collaboration, and innovation.

The club is committed to fostering a culture of technical excellence, creative problem-solving, and entrepreneurial thinking among students. Through workshops, seminars, hackathons, and collaborative projects, GM Vertex Club provides a dynamic environment where students can develop practical skills beyond the traditional classroom setting.

GM Vertex Club has consistently organized events that bring together students from various disciplines to collaborate on technology-driven projects. The club maintains an active community of members who share a passion for technology and innovation.

With a strong alumni network and growing industry connections, GM Vertex Club continues to be the driving force behind student innovation at Gomendra Multiple Campus.

Our Mission: To cultivate a thriving ecosystem of technology enthusiasts by providing hands-on learning experiences, mentorship, and opportunities that transform students into industry-ready professionals and innovative thinkers who contribute meaningfully to society.

Table 1
Benefits of Participation

Benefit	Description
Networking	Connect with like-minded peers, mentors, industry professionals, and campus faculty. Build lasting relationships that extend beyond the event.
Innovation	Push creative boundaries by working on cutting-edge problems. Develop solutions that showcase your ability to innovate under pressure.
Learning	Gain hands-on experience with modern technologies, development methodologies, and project management skills in a high-intensity environment.
Industry Exposure	Interact with judges and mentors from the industry. Get valuable feedback on your ideas and understand what industry leaders look for in solutions.

About GMC Internal Hackathon 2026

GMC Internal Hackathon 2026 is an exciting 36-hour hackathon organized exclusively for students of Gomendra Multiple Campus. This event brings together the brightest minds from across the campus to collaborate, innovate, and build impactful technology solutions within a compressed timeframe.

Purpose

The hackathon is designed to provide students with an immersive, real-world problem-solving experience. It encourages participants to think beyond textbooks, work in teams, and deliver functional prototypes that address real-world challenges.

Objectives

- Foster a culture of innovation, creativity, and technical problem-solving within the campus.
- Encourage collaborative teamwork and interdisciplinary cooperation among students.
- Provide a platform for students to apply classroom knowledge to real-world challenges.
- Identify and nurture talented students with high potential in technology and innovation.
- Strengthen the campus's innovation ecosystem and industry readiness.
- Promote ethical technology usage and responsible innovation.

Expected Outcomes

- Functional prototypes and innovative solutions to real-world problems.
- Enhanced technical skills and hands-on development experience for all participants.
- Strengthened professional networks and peer relationships.
- Identification of promising projects for further development and incubation.
- Documentation of innovative ideas that can be presented to industry stakeholders.

Benefits for Students

Important

The official problem statement and challenge theme will be announced during the opening ceremony. Participants must build their solutions only after the official theme announcement. Any work started before the theme reveal will not be accepted.

Theme Reveal

The official problem statement and challenge theme for GMC Internal Hackathon 2026 will be revealed during the opening ceremony on Day 1. This approach ensures a level playing field and tests participants' ability to adapt, innovate, and collaborate under time constraints.

Participants are encouraged to come prepared with general development tools, environments, and frameworks set up prior to the event. This will allow teams to begin development immediately after the theme announcement.

The theme is carefully selected to address relevant real-world challenges, ensuring that solutions developed during the hackathon have genuine potential for impact beyond the event.

Eligibility

GMC Internal Hackathon 2026 is exclusively organized for students of Gomendra Multiple Campus. The following eligibility criteria apply to all participants:

- Only currently enrolled students of Gomendra Multiple Campus (GMC) are eligible to participate.
- Participation is strictly in teams. Individual participation is not permitted.
- Each team must consist of 3 to 4 members.
- Each participant may join only one team. Dual membership in multiple teams is not allowed.
- Teams must complete their registration before the announced registration deadline.
- All team members must be present throughout the hackathon duration.

Note

Incomplete registrations or teams with members who do not meet the eligibility criteria will not be considered. Ensure all team details are accurate and complete before the registration deadline.

Rules and Code of Conduct

All participants are expected to adhere to the following rules and code of conduct throughout the hackathon. Violation of any rule may result in disqualification at the discretion of the organizers.

Original Work Only: All projects must be original work created during the hackathon. Pre-existing projects or submissions from previous competitions are strictly prohibited.

No Plagiarism: Plagiarism in any form — code, design, documentation, or idea — will result in immediate disqualification. All code will be checked for originality.

Respect Mentors and Judges: Participants must treat mentors, judges, organizers, and fellow participants with courtesy and respect at all times.

Ethical AI Usage: AI tools may be used as assistants for development. However, the core idea, architecture, and significant implementation must be the team's original work. Over-reliance on AI-generated code without understanding will be penalized.

Open-Source Libraries Allowed: Participants may use open-source libraries, frameworks, APIs, and publicly available tools. Proper attribution must be included.

No Offensive Content: Projects must not contain offensive, discriminatory, violent, or otherwise inappropriate content. All solutions must be inclusive and respectful.

Follow Campus Regulations: All participants must comply with Gomendra Multiple Campus rules, regulations, and policies. Campus facilities must be used responsibly.

Professional Behavior: Unprofessional conduct including harassment, bullying, disruptive behavior, or any form of misconduct will not be tolerated.

Dress Code: Participants must wear college dress (uniform) during the opening ceremony and the presentation/judging round. During all other times (development sessions, breaks, etc.), participants may dress casually but must maintain a neat and presentable appearance.

Decisions Are Final: All decisions made by the organizers and judges are final and binding. No appeals or disputes will be entertained regarding judging outcomes.

No Sabotage: Any attempt to interfere with another team's progress, access their code without permission, or engage in any form of sabotage will result in immediate disqualification.

Development Rules

The following development rules ensure fair competition and authentic participation during the hackathon:

- Development must begin only after the official theme reveal during the opening ceremony.
- Teams are free to use any technology stack, programming language, or platform of their choice.
- Internet access will be available throughout the event for research, API integration, and resource downloads.
- Existing frameworks, libraries, and publicly available tools may be used to accelerate development.
- Pre-built templates and boilerplate code are allowed as a starting point, provided teams significantly extend and customize them during the hackathon.
- Projects must substantially demonstrate original work completed during the hackathon period. Merely assembling pre-existing components without meaningful development will not meet submission criteria.
- Teams should maintain clear commit history that reflects their development progress during the event.
- All code, assets, and project materials must be stored in the designated repository.

Repository and Version Control

Proper version control is a mandatory requirement for all participating teams. A well-maintained repository demonstrates development progress and ensures transparency in the evaluation process.

Repository Requirements

Repository is mandatory for all teams. The repository must follow the naming convention: gmc_teamname (e.g., gmc_gmvertex). The repository must be public on GitHub. The commit history must clearly reflect development progress during the hackathon.

- Create a dedicated repository for your hackathon project before development begins.
- Repository naming format: gmc_teamname (e.g., gmc_gmvertex, gmc_coders, gmc_innovators).
- The repository must be public on GitHub.
- Commit history should clearly reflect the development timeline during the hackathon.
- Regular commits (at least one every few hours) are encouraged to show consistent progress.
- Include a comprehensive README with project description, setup instructions, and usage guide.
- Ensure all team members have appropriate access to the repository.

Submission Requirements

Each team must submit the following deliverables by the submission deadline on Day 2. Late submissions will not be accepted under any circumstances.

Table 2
Required Deliverables

#	Deliverable	Description
1	Source Code Repository	Complete source code hosted on a version control platform with clear commit history
2	Working Project	A functional, deployable, or demonstrable version of the project that can be presented live
3	README	A clear and comprehensive README file that must include: (a) Project Title — a concise, descriptive name for the project; (b) Tech Stack — list of technologies, languages, frameworks, and tools used; (c) Environment and Dependencies — required software, runtime versions, and packages to install; (d) How to Run/Deploy — step-by-step instructions for local setup, configuration, and deployment.
4	Installation Instructions	Step-by-step instructions for setting up and running the project locally or in a development environment

Not Required

Technical Documentation, Business Documentation, and lengthy reports are NOT required for this hackathon. Focus your energy on building a great product and delivering an impressive live demo.

Presentation and Live Demo

No presentation slides are required for GMC Internal Hackathon 2026. Instead, every team must deliver a compelling live demonstration of their project to the judging panel.

Each team's presentation must include:

Live Demonstration: Show your project working in real-time. Demonstrate the core functionality and user experience.

Feature Walkthrough: Guide the judges through all key features and capabilities of your solution.

Business Model: Present a clear and viable business model for your solution. Explain your target audience, revenue model or sustainability plan, value proposition, competitive advantages, and a brief market analysis.

Problem Explanation: Clearly articulate the problem you are solving and why it matters.

Solution Explanation: Explain your approach, methodology, and how your solution addresses the problem.

Technical Implementation: Briefly cover the technology stack, architecture decisions, and any innovative technical approaches.

Questions and Answers: Respond to questions from judges with clarity and confidence. Be prepared for technical deep-dives.

Tip

Practice your demo beforehand. A well-rehearsed 10-minute demonstration is far more effective than a disorganized 20-minute one. Keep it concise, focused, and impactful.

Judging Criteria

Projects will be evaluated by a panel of judges based on the following criteria. Each criterion is weighted to reflect its importance in the overall assessment.

Table 3

Judging Criteria and Weights

Criteria	Weight
Innovation and Originality	25%
Problem Understanding and Relevance	20%
Technical Execution	20%
Business Viability	20%
Presentation and Live Demo	15%
Total	100%

Schedule

GMC Internal Hackathon 2026 spans two days of intensive development, mentorship, and evaluation. Below is the detailed schedule for the event.

Day 1 — Friday, July 24, 2026

Table 4

Day 1 Schedule

Time	Activity
07:00 AM – 08:00 AM	Participant Registration and Breakfast
08:00 AM – 08:30 AM	Opening Ceremony
08:30 AM – 09:00 AM	Welcome Address by GM Vertex Club Coordinator and Campus Representatives
09:00 AM – 09:30 AM	Hackathon Orientation (Rules, Judging Criteria and Code of Conduct)
09:30 AM – 10:00 AM	Theme Reveal and Problem Statement Announcement
10:00 AM – 12:00 PM	Development Session Begins
12:00 PM – 01:00 PM	Lunch Break
01:00 PM – 06:00 PM	Continuous Development
06:00 PM – 07:00 PM	Mentor Checkpoint and Progress Review
07:00 PM – 08:00 PM	Dinner Break
08:00 PM – 10:00 PM	Continuous Development
10:00 PM – 12:00 AM	Continuous Development (Optional — Teams may rest)

Day 2 — Saturday, July 25, 2026

Table 5

Day 2 Schedule

Time	Activity
12:00 AM – 07:00 AM	Overnight Continuous Development
07:00 AM – 08:00 AM	Breakfast
08:00 AM – 09:00 AM	Mentor Checkpoint and Progress Review
09:00 AM – 10:30 AM	Final Development and Bug Fixing
10:30 AM	Project Submission Deadline
10:30 AM – 11:00 AM	Presentation Setup and Technical Check
11:00 AM – 02:00 PM	Project Presentations and Judging
12:00 PM – 01:00 PM	Lunch Break
02:00 PM – 02:30 PM	Chief Guest Address and Judges' Feedback
02:30 PM – 03:00 PM	Winner Announcement and Prize

	Distribution
03:00 PM – 04:30 PM	Closing Ceremony, Certificate Distribution and Group Photo

Note

The schedule may be subject to minor adjustments. Any changes will be communicated to participants in advance through official channels. Teams are expected to be present for all mandatory activities.

Prize Pool

GMC Internal Hackathon 2026 offers an exciting prize pool to recognize and reward the most innovative and impactful solutions. In addition to cash prizes, winners receive prestigious certificates, gift vouchers, and opportunities for professional growth.

Total Prize Pool

NPR 20,000

Awards and Categories

Table 6

Awards and Categories

Category	Details
Junior Category Winner	Awarded to the best-performing team from junior-level students
Senior Category Winner	Awarded to the best-performing team from senior-level students
Best Implementation	Special award for the most technically impressive execution

Additional Benefits

Certificates: All participants will receive certificates of participation. Winners and special awardees will receive certificates of achievement.

Gift Vouchers: Top-performing teams will receive exciting gift vouchers from sponsors and partners.

Internship Opportunities: Outstanding participants may receive internship opportunities with partner organizations and industry collaborators.

Professional Training Opportunities: Exceptional teams may be offered specialized training programs and workshops to further develop their skills.

Recognition: Winning teams will be featured on GM Vertex Club's official social media channels and campus publications.
